

CSE3002 – Internet and Web Programming Lab

Faculty Incharges : Prof S.Maheswari & Dr Prasanna

Lab Exercise 5 – 20/08/2020 (L58+L59+L60)

Exercise 1

Create a Tip Calculator using java script to design an interface that allows you to enter the amount of the tip. Then enter the percentage you would like to tip and the number of people to split the tip with. Use three text input elements. Calculate and dynamically display the tip.

Exercise 2

Design a Registration Webpage for an insurance company. The form must contain a minimum of 10 fields. Implement the Java Script to validate the Name, E-Mail and Mobile Number in the registration form. Use regular expression to validate the form fields. Also validate the form for empty field submissions.

Exercise 3

Write a java script program to check two numbers and return true if one of the number is 200 or if the sum of the two numbers is 200
