

CSE3002 – Internet and Web Programming Lab

Faculty Incharges : Prof S.Maheswari & Dr Prasanna

Lab Exercise 2 – 23/07/2020 (L58+L59+L60)

1. Create a user registration webpage using HTML Form elements (Input types) for a hackathon event registration. The webpage must contain the following input types to get the details of the students.
Input Types: - Textfields, Textarea, checkbox, radio button, submit button, reset button, drop down box, images (if required).

Note:

- Apply styles, Formatting tags of HTML for good design.
- Use HTML 5 new input types to display additional contents

2. Create your customized web page using necessary form controls as given below.

The image shows a screenshot of a web form titled "BOOK AGENT TICKET" with the subtitle "From IRCTC Authorized Agent". At the top, there is a logo for "IRCTC Authorized Agent" featuring the IRCTC logo and a train icon. The form is set against a background image of a person's hair. The form fields are as follows:

- Reservation Quota: A dropdown menu.
- Train name or number: A text input field.
- If choice two Train name or number: A text input field.
- Journey From: A text input field with a label "If first choice berth not meet for Tatkal" above it.
- Journey To: A text input field with a label "Station Code or full station name ." above it.
- Class: A dropdown menu.
- Departure/Journey Date: Three input fields for Day (02), Month (12), and Year (2019).
- A "Next" button is located at the bottom right of the form.
